

We are an independent Swiss company based in the St. Gallen Rheintal in Rebstein and committed to innovation at the forefront. With our own development and production department, we market our high-quality dental products in around 40 countries. To support our head of R&D and QM, we are looking for a dedicated and initiative personality for an

Internship Regulatory Affairs - Employment 50%

Dental plastic materials (composites, adhesives, 3D resins)

Your areas of responsibility

- Assisting in the maintenance of Technical Documentations in English, incl. clinical assessments
- Support in the implementation of regulatory requirements for class IIa medical devices (ISO 13458, MDR and 510k)

Your profile

- Master in Dentistry or Chemistry (UAS, University, ETH), Plastics or Polymer Chemistry
- Pleasure in scientific research and processing of documentations (literature research, risk management, clinical assessments)
- very good German and English skills in words and writing

The internship lasts one year and can be done remotely for the most part. A future full-time employment is possible by mutual agreement. Do you feel addressed? Then send your application documents in electronic form to Mrs. Franca Schmid, CEO. Email: franca.schmid@saremco.ch
