

THE PERMANENT CROWN FROM SAREMCO - NEW MADE FROM PHROZEN 3D PRINTERS!

Biocompatibility and functionality of products for modern, digital, and demanding dentistry – same goals for SAREMCO and Phrozen. saremco print CROWNTEC™ is now validated and approved for Phrozen 3D printers. Customers from SAREMCO and Phrozen will benefit equally from affordable printers, as well as strong and aesthetically attractive materials for 3D printing. The printers from Phrozen and the 3D printing materials from SAREMCO are ideally matched to each other, so that they harmonize perfectly and offer an optimal printing result.

SAREMCO Dental AG is recognized as a dental company that conducts intensive research for more than 30 years now, particularly known for its competence in the field of light-curing resins for restorative dentistry with unique selling points in terms of biocompatibility and functionality. SAREMCO has been transferring its knowledge and experience to development in the field of digital dentistry for several years and successfully launched two products on the market last year. This includes in particular the 3D printing material saremco print CROWNTEC.

saremco print CROWNTEC is one of the first materials on the world market to be approved for printing permanent crowns, inlays, onlays, veneers, and artificial teeth for dentures. The CE-marked Class IIa 3D printing material, which also recently received 510(k) clearance, sets new benchmarks with superior physics and a wide range of colours.

Phrozen was founded by a group of Taiwanese 3D printing enthusiasts in 2016. They produce professional consumer-friendly 3D printers for industrial application, medical and personal use. After running successful Kickstarter campaigns, they have now expanded to the U.S., Europe, Japan, and South Korea! Their clients include those in the dental industry, the jewellery industry and all those interested in creating digital models.

saremco print CROWNTEC is now approved for Phrozen's 3D printer models Sonic 4K 2022 and Sonic 4K XL 2022. Customers will find the new resin profile at: www.phrozen3d.com/pages/resin-profile

The material is available in the following colours (other colours on request):

- A1 / A2 / A3
- B1
- Snow White
